

Automated Door Systems

Automatic Windows

OVERVIEW

For those who are unable to manually open their windows, we offer a wide range of battery powered and electronic window openers. These can be supplied and fitted, to allow ventilation control by remote. Wind, rain and temperature sensors are available.

Manual Opener

Electronic Opener

Battery Operated Window Opener

This, sought after, remote controlled RV 2900 window opener allows ventilation, at a touch of a button, for those inaccessible areas.

This is ideal for those who are wheelchair bound or have difficulty locking/unlocking windows. Just one click on the button, is all that is required

From a security aspect, the product is particularly safe as it makes use of more than one billion combination codes.

- * No Wires
- * Battery operated
- * Easy to use remote
- * Fit to existing windows
- * High security

Specification

This product, measuring only 300mm in length, 50mm in depth and 65/70mm in height, is independently powered by 4 xAA batteries and is straightforward to install.

The RV2900 can be used on vent or casement windows. Maximum size 100cm x 100cm and minimum size 30cm x 26cm.
